

## **North London Hospice Referral Criteria**

We will consider patients who have a potentially life limiting illness and one or more of:

- complex symptoms – physical, emotional, spiritual
- complex psychosocial issues in family/carers
- likely prognosis of < 1 year

In addition our Outpatient & Therapies Service will also consider those who:

- continue to experience challenges as a consequence of having had treatment for, or continuing to live alongside, a potentially life limiting illness – ‘survivors’
- require interventions such as ongoing infusions or transfusions or abdominal paracentesis
